

LANDMARK Solaris™

Solar Reflective Shingles

The secret is in CertainTeed's advanced roofing granules that reflect solar energy and radiate heat far better than traditional roofing shingles.

Landmark Solaris forms a barrier between your roof and the sun that can reduce your roof's temperature by as much as 20° F in the summer. And that means lower energy costs and greater savings over the life of your roof.

So cool, it's rated for rebates –

Landmark Solaris is rated by Cool Roof Rating Council (CRRC) for cool roofs and meets California's Title 24 requirements for cool steep slope roofing and may qualify for credits/points in LEED®, NAHB® and other "green" programs.

And some utility companies offer a rebate for Landmark Solaris that can put as much as \$300 back into a homeowner's pocket for an average 3,000 sq. ft. roof. Landmark Solaris shingles are ENERGY STAR qualified roof products that meet both solar reflectance and thermal emissivity requirements.

- Lifetime limited, transferable warranty against manufacturing defects*
- 10-year SureStart™ protection
- U.L. certified to meet ASTM D3462

*See actual warranty for specific details and limitations.
NOTE: REPRODUCTION OF COLORS throughout this swatch board is as accurate as modern printing will permit. Colors are subject to changes by granule manufacturers.
