Premium, "Breathable"*

# Roof Deck Protection

**Premium Roof Deck Protection should protect your home and "breathe" at the same time (amazingly, most so-called premium products do NOT breathe!)**

It provides a critical extra layer of protection between your shingles and your roof deck — to help prevent wind-driven rain (or water from other sources) from infiltrating under your shingles and causing damage to your roof structure or to the inside of your home. In addition, a premium quality roof deck protection will:

- "Breathe" to allow moisture from inside your attic to escape (to help prevent structural decay, mold, and mildew)
- Provide longer-lasting leak protection than conventional "felts" (which can rot or become brittle before your shingles reach their useful life)
- Lay flatter, so your shingles will lay flat and uniform

*Deck-Armor™ Roof Deck Protection is a key part of the  
F-Elk Smart Choice® Roof System Solution (see back).*
