Ventilation**

*Protect Your Roof
From Premature Deterioration
With A Green Machine Solar Powered*

Exhaust Vent

Effective attic ventilation is critical for a long-lasting roof—yet most homes have insufficient attic ventilation!

A Solar Powered Roof Exhaust Vent will help to:

- Remove excess heat and moisture to protect your roof from premature deterioration
- Safeguard your attic possessions against mildew damage
- Limit the growth of harmful mold
- Protect your roof from premature deterioration and roof rot
- Minimize peeling and extend the life of exterior and interior paint
- Guard against ice damming in harsh winter climates
- Possibly reduce excessive heating and air conditioning costs

Master Flow® Green Machine™ Solar Powered Roof Exhaust Vents are a key of the GAF-Elk Smart Choice® Roof System solution, and have even earned the prestigious Good Housekeeping Seal (see reverse).

How it works...

Hot, stale attic air is removed through the solar-powered roof exhaust vents. Fresh air is drawn into your attic through your soffit (or other) intake vents.
