

InSpire Cedar Shake

Natural-look Cedar Roofing... InSpired Style with Minimized Fire Risk

Historically, the natural elegance of shake roofing has come at a high cost from recurring maintenance, the risk of decay, and even worse, fire. **InSpire™ Roofing Cedar Shake** is changing the concept of shake roof architecture. Carrying a limited lifetime warranty, our Cedar Shake combines *optimum fire protection with no maintenance ever being required.*

InSpire Cedar Shake carries a Class A fire rating. In comparison, some wood shake roofing is available as Class B (moderate fire exposure), while much of it is either Class C (light), or else carries no fire rating at all. The Composition (which is 100% recyclable) is an innovative mineral filled polyolefin that is able to withstand the elements. Durability combines with authenticity that's imparted by state of the art molding technology. All the attraction of natural shake roofing is delivered with significantly lower investments in money and

time, while enjoying increased "Life Cycle" savings. In addition, each bundle is pre-sorted for color and widths at the Factory and the shingle locking Tabs provide an easy method of installation that will result in a structurally sound roof system. Since our Cedar Shake is virtually maintenance-free, InSpire relieves homeowners from chores that risk safety. There is no need to get the ladder out and scale the roof to perform work at dangerous heights, or hire someone to do so. InSpire's durability also makes it the sustainable cedar

alternative. In addition to the stated benefits, there's no forced reliance on chemical treatments that need to be repeated every several years for wood shakes that could themselves require replacement in less than 20 years. With this next-generation shake roofing, homeowners don't have to commit to lower fire resistance ratings or the ongoing cost of periodic roof service calls. InSpire allows them to easily embrace the shake style they love while gaining the peace of mind and charm that endures for a lifetime.
