

Energy star qualified
Inspire Cool Roofing

Try something different using InSpire's Cool Roofing

InSpire Slate Cool Roofing is the graceful way to live more sustainably. Our cool colors reduce a home's carbon footprint and reduce monthly energy bills by cutting peak cooling demand by up to 15 percent. Advanced colorants help reflect sunlight and reradiate heat away from the roof, reducing the heat transferred into a home.

CR-730 Evergreen

CR-731 Ash Grey

CR-732 Granite

CR-733 Graphite

CR-734 Mountain Plum

CR-735 Terra Cotta

CR-736 Wheat

CR-737 Sand

CR-738 Red Cedar

CR-792 Wintergreen

InSpire Slate cool roofing provides elegant, timeless character compared to similarly priced metal cool roofs, thereby meeting every aesthetic, functional and sustainable need. Cool roofing can add one or more LEED points to the several potential LEED credits already available with InSpire Slate.

By enhancing the environment, helping create sustainable projects and giving homeowners beauty that generates cost savings – cool roofing is the latest reason why InSpire surpasses quarried slate with unprecedented appeal and value.
