

INNOVATIONS FOR LIVING®

Owens Corning Roofing & Asphalt, LLC is pleased to announce the upgrade of our Manufacturer's Warranty to provide Limited Lifetime* warranty protection on every Owens Corning™ laminated shingle, which includes our Oakridge® and all Duration® Series shingles installed on or after January 24, 2011.

All Owens Corning™ laminated shingles meet or exceed Industry standards for performance, including ASTM 3161 Class F (110mph) for Oakridge® and ASTM D 7178 Class H (150mph) for all Duration® Series shingles. In addition, over the past several years, we've re-engineered our glass mat, raised the weathering specs of our asphalt, and improved the performance of our Tru-Bond® sealant. This provides confidence that all our laminated products will perform as indicated within our new warranty terms.

Owens Corning Roofing continually places great focus on product quality and performance—indicators of product durability. These features are highly valued by consumers. The decision to enhance our product warranty to Limited Lifetime on our Oakridge® and Duration® Series shingles shows our commitment to ensuring our customers and contractors remain competitive in the marketplace.

Please refer to the attached **Frequently Asked Questions** document and **Warranty Change Summary** sheet for more information. If you have further questions, contact your Area Sales Manager or National Accounts Manager or visit www.roofing.owenscorning.com.

Sincerely,

A handwritten signature in black ink, appearing to read "Sheree Bargabos". The signature is fluid and cursive, with the first name "Sheree" and last name "Bargabos" clearly distinguishable.

Sheree Bargabos,
President & General Manager
